Flarium Ltd. Releases the New Version of its Flash Sound Player Makers

” Flarium announced today the release of the new Fun SoundPlayer Maker 2.3 and FlashWamp 1.1 - easy to use tools which allow creating flash sound players and publishing them to websites.

Vancouver, Canada – April 21, 2008 – **Flarium** has released the new versions of its Fun SoundPlayer Maker and FlashWamp - Flash tools for creating flash-based web music players. The new **Fun SoundPlayer Maker 2.3** and **FlashWamp 1.1** contain **SWFObject 2.0** - an easy-to-use and the most popular method to embed Flash content.

The main features of Fun SoundPlayer Maker 2.3 and FlashWamp 1.1:

- SWFObject 2.0 is included with the programs to remove "Click to activate" requirement of Internet Explorer;
- Create flash music player using one of 35+ player templates (Fun SoundPlayer Maker) or any Winamp skin (FlashWamp);
- MPEG audio streaming support allows embedding both mp3 audio and online radio in your website;
- All player skins are customizable;
- Programs generate the SWF file and HTML code ready to be inserted into a web page.
- Create players like an on/off button (Fun SoundPlayer Maker only) or full-functional players with control buttons;
- Record voice message and add it to a playlist (Fun SoundPlayer Maker only).

Flash sound player is the best way to embed audio in a web page. Fun SoundPlayer Maker and FlashWamp help to create and publish web sound players easily and don't require programming skills or Flash experience. Flash music players created using Fun SoundPlayer Maker or FlashWamp allow website visitors to control playback fully and enjoy great mp3 music or

online radio. These players are easy to use even for those users who use Internet Explorer as a browser because they don't require additional clicks for activation. The programs contain SWFObject 2.0 - a small JavaScript file which prevents Internet Explorer from blocking web pages with Flash object and helps to remove IE's "Click to activate" requirement.

Fun SoundPlayer Maker and FlashWAmp run under Windows 98/Me/NT/2k/XP
